Professional Summary

Senior software developer with **150+ delivered projects** across freelancing and in-house work. Builds and maintains web applications from requirements through long-running production support. Comfortable across the PHP ecosystem — Laravel, CakePHP, CodeIgniter, WordPress, Joomla, Drupal — with front-end delivery from design files to production HTML.

Current work includes hands-on Laravel delivery on GrowSharely under **WINWINSP** (Win-Win Service Provider). Delivers remotely for international clients (Australia, Canada, Singapore, UK) through written requirements and structured documentation. Writes clear documentation alongside code.

Technical Skills

Languages & frameworks: PHP · Laravel · Raw PHP · CakePHP · CodeIgniter · HTML · CSS · JavaScript

Platforms: WordPress · Joomla · Drupal

Practices: Feature delivery with automated tests · Requirements analysis · Legacy stabilisation · Project recovery · Remote client delivery · Technical writing (English)

Tools: Git · PHPUnit

Professional Experience

Win-Win Service Provider (WINWINSP) — Senior Software Developer

June 2026 – Present · Remote (Asia/Dhaka)

Engineering practice and product delivery. Formal employment title subject to confirmation.

- Delivered core domain modules on GrowSharely — share inventory, allocation, nominees, collections, banking, dashboards, portfolio, and audit — as part of fourteen-area V1 scope (snapshot **29 June 2026**).
- Built on certified SaaS foundation (auth, RBAC, projects, profiles) frozen on **23 June 2026** before domain expansion.
- Maintained automated test coverage — **409 tests (1,508 assertions)**, snapshot **10 July 2026**.
- Documented key technical decisions and shipped features with matching handbook material.
- Applied WINWINSP delivery standards — foundation-first sequencing and architect-reviewed plans before build.

Freelance & In-House Software Development — Software Developer

Career aggregate · Prior employer names and date ranges not yet documented in portfolio

- Delivered **150+ software projects** — new builds, long-running maintenance, and recovery of codebases left by prior developers.
 - Built web applications and CMS implementations across varied client contexts and technology stacks.
 - Implemented pixel-accurate front-end work (PSD-to-HTML, PSD-to-WordPress) where UI fidelity mattered alongside backend logic.
 - Collaborated remotely with international clients through written requirements and structured documentation.
 - Worked under direct client accountability — quality and precision without large-team buffers.
-

Selected Project

GrowSharely — Multi-project stakeholder transparency platform (reference product, WINWINSP)

Laravel · Operational SaaS · 2026

One recent reference product — **not** the summary of a 150+ project career.

- Built share register, payment collection, banking, and portfolio views for multi-party project operations.
 - Separated domain concepts so computed financial truth stays auditable.
 - Shipped V1 core scope with documentation maintained alongside implementation.
-

Education

Daffodil International University — Dhaka, Bangladesh

Master of Science (MS), Management Information Systems (MIS) · 2004–2006

Daffodil Institute of IT — Dhaka, Bangladesh

Bachelor of Science (BSc), Computing and Information Systems (CIS) · 2001–2003
